

**Associate Professor or Senior Lecturer
in Veterinary Pathology**

The College now seeks an experienced Veterinary (Anatomic) Pathologist at either the Associate Professor or Senior Lecturer level to join the team. The role can be offered as either Teaching and Research, or Clinical/Professional Practice Scholar ('clinical track') profile, depending on experience and qualifications.

Veterinary Pathology is a key discipline within the College of Veterinary Medicine, with veterinary anatomic pathology being a core subject within the internationally accredited veterinary science degree at Murdoch. The pathology team provides teaching instruction across four years of the veterinary program, and into other majors within the School of Veterinary and Life Sciences, conducts wide-ranging research, and contributes to the provision of diagnostic pathology services to The Animal Hospital and the wider community in Western Australia.

In addition to an exciting and challenging work environment, you can also experience Perth's natural beauty; located around the idyllic Swan River, with warm, sunny weather and relaxed lifestyle; explore our famous coastline or visit the stunning southwest wine district; famous for its majestic karri forests, bushwalking, wine and wildflowers. Australia is an exciting destination boasting spectacular wilderness, rare wildlife, rich indigenous heritage and friendly hospitality and is the perfect destination for a working holiday.

We have put together an attractive salary package, which includes 17% superannuation. Eligible applicants will possess board certification in anatomic pathology, have current experience in the provision of diagnostic pathology, and will have a veterinary degree that is registrable with the Veterinary Surgeons' Board in Western Australia.

For more information or to apply for this opportunity, please visit <http://jobs.murdoch.edu.au/> where you can view the Position Description and applicant guide. Here you will also find the online form to submit your application.

Previous applicants need not apply.

Candidates will be required to submit:

- A cover letter
- Your most recent resume (CV)
- A statement addressing the selection criteria (found in the Position Description)

Applications close: 28 September 2018
