Tenure track faculty position: Veterinary Anatomic Pathologist

The Department of Microbiology, Immunology and Pathology, College of Veterinary Medicine and Biomedical Sciences, Colorado State University, is seeking a veterinary anatomic pathologist for a tenure track faculty position at the Assistant or Associate Professor level. The position involves a 50% commitment to service activities of the Veterinary Diagnostic Laboratory and a 50% commitment to teaching and research activities in the Department. The Veterinary Diagnostic Laboratory is an AAVLD-accredited, full service laboratory. Service responsibilities are shared among nine pathologists from the Department. The Diagnostic Laboratory receives animals and surgical specimens from veterinary practitioners, animal owners, the Colorado Division of Wildlife, and the Veterinary Teaching Hospital. It also functions as a training site for veterinary students and pathology residents.

Involvement in independent or collaborative research is an expectation. Preference will be given to persons with interests and expertise in digital pathology. We seek to deploy digital pathology for use in diagnostics, research and teaching; the ideal candidate will play a key role in the development and integration of a high-capacity digital pathology program. Opportunities exist to collaborate with the College's established Programs of Research and Scholarly Excellence (PRSE). These are the Infectious Disease Research and Response Network, Cancer Biology & Comparative Oncology, the Animal Reproduction & Biotechnology Laboratory, the Musculoskeletal Research Program, and the Molecular, Cellular, & Integrative Neurosciences Program.

Teaching commitments include practicum teaching during the necropsy laboratory rotations for veterinary students and pathology residents and hospital surgical rotations for pathology residents and graduate students. Didactic classroom teaching in the undergraduate, graduate and/or professional veterinary medicine curricula of the department also is part of the commitment.

Candidates must have a DVM or equivalent, advanced training in anatomic pathology with eligibility for ACVP or ECVP certification, demonstrated experience in applied pathology, pathology training, teaching, mentoring, and collaborative research, and a commitment to diversity, equity, and inclusion in all aspects of the workplace. Preferred qualifications include ACVP or ECVP Board certification in anatomic pathology and a PhD in a related field, experience with digital pathology in diagnostic, teaching, and/or research settings, including experience with hardware and advanced software applications and data base management, and excellent verbal and written communication skills.

Applications and nominations will be considered until the position is filled; however, to ensure full consideration applications should be submitted by February 21, 2019.

Applicants should submit a curriculum vitae and a letter indicating their interests, professional goals, commitment to diversity in teaching and research, and qualifications for the position as described. Please also included a statement about commitment to diversity. Additionally, applicants should provide a list of three professional referees with the cover letter. References will not be contacted without prior notification of candidates.
