

## VETERINARY ANATOMIC PATHOLOGISTS

### Our Company

---

Founded in 2004, AccelLAB is a company dedicated to preclinical contract research in the field of medical devices, mainly cardiovascular and orthopedic types, under the presidency of Dr. Guy Leclerc, Interventional Cardiologist. Since the fall of 2016, AccelLAB is part of Citoxlab group, which is now one of the five major players in the field of preclinical research offering a full range of specialized and preclinical services in its laboratories located in France, Canada, United States, Denmark and Hungary.

The mission of AccelLAB is based on a one-stop service type where clients can find all the services necessary to complete studies on the safety and efficiency of its devices. Thus, the services offered include the study design, execution on an animal model using the best medical imaging equipment available, clinical pathology and histopathology analysis as well as the preparation of reports that will eventually be presented to regulatory agencies. Accredited by AAALAC and CCAC and successfully audited by the FDA in 2012, AccelLAB is fully committed to meet the most demanding requirements of its clients.

Highly specialized services under the same roof;  
Endovascular studies, percutaneous procedures in the cardiovascular field;  
Orthopedic and biomaterial studies;  
Pharmacokinetic studies;  
Histopathology studies;  
CT-Scan, MRI and microCT using digital imaging devices.

Our Canadian facility, located in Boisbriand (Montreal area) is looking for Veterinary Anatomic Pathologists.

### Key Duties

---

We are looking for highly motivated candidates with experience in medical devices or investigative pathology in a Contract Research Organization or pharmaceutical/medical device industry;

These positions report to the Director of Pathology with extensive interaction with the company's scientific and technical staff;

Tasks include communicating with clients. Conference attendance may also be required.

### Responsibilities

---

- ✓ Provide scientific expertise in pathology according to sponsors requirements;
- ✓ Supervise necropsies and perform histopathological examinations on large laboratory species;
- ✓ Write pathology reports
- ✓ Perform pathology peer reviews;
- ✓ Provide training, technical guidance and scientific support to histology and necropsy staff.

## **Knowledge, skills and abilities**

---

A minimum of 1 to 3 years' experience in nonclinical drug/medical device development in a contract research environment;

Strong knowledge of related legislation, principles, practices and procedures;

High degree of self-motivation with effective organizational and time management skills;

Collaborative and team building skills;

Fluent in spoken and written English required, French would be an asset;

Computer knowledge including Microsoft Office.

## **Qualifications**

---

Doctorate in Veterinary Medicine or equivalent, and formal Residency training in Veterinary Pathology;

Board certification by the American College of Veterinary Pathologists (ACVP) or European College of Veterinary Pathologists (ECVP);

Other board certifications (e.g., American Board of Toxicology) or advanced degrees (e.g., PhD) are desirable, but not required;

Prior experience in a CRO or in a comparable drug/medical device development environment (e.g. pharmaceutical, medical device or biotechnology company) and a strong interest in life sciences will be highly valued.

## **Additional information**

---

We offer:

- Flexible work schedule;
- Coaching/mentoring;
- Competitive compensation plan;
- Flexible social benefits program.

## **To apply**

---

If you believe you have the required qualifications and are interested in joining a stimulating work environment where excellence and team work are important values, let us know of your interest by sending us your application.
