

## **Clinical Track Faculty Position in Veterinary Anatomic Pathology**

The [Department of Veterinary Biosciences](#) (VBS), [College of Veterinary Medicine](#) (CVM) at [The Ohio State University](#) (OSU), is seeking outstanding candidates for a full-time clinical track faculty position at the rank of Assistant or Associate Professor.

Title: Assistant or associate professor, clinical

### Responsibilities:

1. **Diagnostic service:** The faculty member will participate in the autopsy and surgical biopsy services of the college. This will involve performing post-mortem examinations and supervising anatomic pathology residents and veterinary students as they perform these examinations. In addition, the position will involve supervising biopsy evaluations. The service receives autopsy and biopsy cases from the OSU Veterinary Medical Center, OSU Large Animal Services ambulatory clinic in Marysville, the Columbus Zoo and Aquarium, the Wilds and Columbus Humane. Autopsy submissions are accepted from referring veterinarians as well.
2. **Teaching:** The position will involve clinical instruction of veterinary students and residents as part of the senior student rotation in applied pathology as well as residents in the surgical biopsy rotations. Teaching in the professional veterinary medical curriculum and the didactic resident courses is also expected.
3. **Research and scholarly activity:** Collaborative research and appropriate scholarly activity synergistic with the clinical service are also an expectation of the position.

**Qualifications:** Applicants must have a DVM (or equivalent) from an AVMA-accredited or equivalent institution and be board certified or board eligible in anatomic pathology by the American College of Veterinary Pathologists or the European College of Veterinary Pathology. A PhD or other advanced training in anatomic pathology is highly desirable. The successful applicant must possess exceptional interpersonal and communication skills and demonstrate effectiveness in teamwork.

The Department comprises 25 faculty, including 12 Diplomates of the American College of Veterinary Pathologists (8 certified in anatomic pathology and 4 certified in clinical pathology), and combines the disciplines of oncology, immunology, microbiology, physiology, and anatomy. The College is a member of the most comprehensive Health Sciences Center in America, which includes the Colleges of Veterinary Medicine, Medicine, Pharmacy, Public Health, Dentistry, Optometry, Nursing, and Allied Health Sciences on a single campus. The anatomic pathology service manages a diverse caseload, and is supported by a well-equipped laboratory, and dedicated staff, faculty, and residents. In addition, the service offers highly regarded specialty diagnostic pathology in renal pathology, dermatopathology and reproductive pathology. Unique resources in the college include a dedicated Office of Teaching and Learning, an active Clinical Trials Office, a Biospecimen Repository, the Center for Retrovirus Research, and the Comparative Pathology & Mouse Phenotyping Shared Resource. The OSU University Institute of Teaching and Learning provides guidance on evidence-based instructional strategies to support and enhance the teaching efforts of faculty. OSU has an NIH-designated Comprehensive Cancer Center with over 300 scientists, the Center for Clinical and Translational Science, a Genetically Engineered Mouse Modeling Shared Resource, an administratively centralized and accredited laboratory animal resource

program, extensive small animal imaging support, and campus-wide graduate education programs in molecular, cellular and developmental biology, biochemistry, neuroscience, and molecular life sciences, including the CVM Comparative & Veterinary Medicine Graduate Program.

Columbus, Ohio's capital and largest city, offers a convenient lifestyle with affordable housing and easy commutes. Residents enjoy the many amenities of the city including professional sports teams, museums, outstanding restaurants, performing arts, parks, as well as unique boroughs and neighborhoods.

Applications should be submitted via email as a single pdf document and include curriculum vitae, statement of career goals/cover letter, and the names (with complete mailing address, phone, FAX, and E-mail) of at least four individuals from whom letters of reference may be solicited. Academic rank and salary are negotiable and commensurate with the candidate's background and experience. Address all correspondence to the Chair of the Search Committee, Dr. Christopher Premanandan ([Premanandan.1@osu.edu](mailto:Premanandan.1@osu.edu)), Department of Veterinary Biosciences, The Ohio State University, 1925 Coffey Road, Columbus, OH 43210. Review of applications will begin December 16<sup>th</sup>, 2019 and will continue until the ideal candidate has been selected.

The College of Veterinary Medicine and The Ohio State University are committed to establishing a culturally and intellectually diverse environment that supports the free exchange of ideas in a professional and collegial manner in all academic endeavors as we engage audiences and serve our communities from a wide spectrum of backgrounds and experiences. The Ohio State University is an EEO/AA Employer and fosters a tobacco-free environment. All qualified applicants will receive consideration for employment without regard to race, color, age, religion, sexual orientation or identity, national origin, disability, or veteran status.
