

Hamilton, NZ

Veterinary Anatomic Pathologist

IDEXX has been changing the veterinary, livestock, water testing, and dairy markets for the better since 1983. Headquartered in the US and a leader in innovative pet healthcare, we service practicing veterinarians around the world with a broad range of diagnostic and information technology-based products and services. Our products enhance the ability of veterinarians to provide advanced medical care, improve staff efficiency, and build more economically successful practices. We also provide worldwide diagnostic tests and information for livestock and poultry, as well as testing for the quality and safety of water and milk. Through innovation, passion, and integrity, we've set a new standard for detection and analysis that continues to enhance the well-being of pets, livestock, and people around the world.

With a continued and rapid growth trajectory in New Zealand, we are looking for an Anatomic Pathologist to join our team in Hamilton. We provide full scope veterinary pathology services to a large client base across New Zealand, which provides a stimulating caseload including companion and production animals, equine, and wildlife.

As our Anatomic Pathologist you will...

- Provide outstanding professional diagnostic and interpretive services to our clients, exercising professional authority and judgement through written reports and telephone consultations
- Use your expertise and knowledge to deliver educational presentations to clinicians and professional organisations
- Mentor and coach our technical specialists
- Actively participate in quality management
- Work with our Internal Medical Consultants, and National Sales and Marketing teams to provide valuable insight into our delivery of "The Complete Diagnostic Solution".

Your day will be spent delivering an efficient, effective, comprehensive and timely veterinary pathology service with diagnostic anatomic pathology evaluations, interpretations and follow-up consultation. You will have access to the very latest high-resolution digital pathology solutions to enable you to collaborate easily with your IDEXX colleagues throughout the country and the world.

In addition, the responsibilities of our pathology team include participating in training and education opportunities for veterinary clients, participating in internal and external quality control programs within the national laboratory network and contributing to the continuous quality improvement processes. Our professional team environment provides great opportunities for Continuing Professional Development and excellent support for your career.

What do you need to succeed?

We are looking for an Anatomic Pathologist with interest and experience in domestic and production animals. Competence in cytology is desirable but not essential. A veterinary degree suitable for New Zealand registration is required. Further qualifications for the role include either ACVP/ECVP board certification/eligibility, or Australian Fellowships in Veterinary Pathology. The ability to build long-lasting relationships with our clients and actively participate in their continued education is key, and you will need a high level of drive and self-motivation with an outstanding customer service ethic.

What we can offer?

This is a true opportunity join a global market leader that continues to reinvest \$100M per annum into research and development within veterinary diagnostics. You will be working in an innovative environment, utilising the latest technology and contributing holistically to an organization that improves the lives of pets, people and livestock in New Zealand.

We build and share knowledge, foster collegiality, and facilitate collaboration through regular case reviews with an IDEXX team of diagnostic professionals (both locally and globally). We also endorse and encourage CPD with an emphasis on regular attendance at national and international conferences. There is some flexibility in terms of working hours, and we provide ongoing health and wellness activities, and voluntary community leave entitlements.

If you are interested in making a difference with a growing market leader, please forward your application to Kathryn Kelly, Talent Acquisition Specialist, Kathryn-Kelly@idexx.com.
