Leading the Science. Today. Together.

Head of Investigative Pathology (2012084)

THE POSITION

A lot to do despite Corona! Boehringer Ingelheim is still looking for new colleagues!

We are looking for a new colleague to join our Investigative Toxicology Group at our largest R&D site in Biberach an der Riss. As Head of Investigative Pathology you will contribute your scientific expertise to the development of project specific de-risking strategies and perform toxicopathological evaluation of exploratory / mechanistic toxicology studies.

If you have an open and creative mindset and want to work in an agile environment, apply now!

Tasks & Responsibilities

- In your new role you lead the Investigative Pathology laboratory.
- You are responsible for the flexible and timely toxicopathological evaluation, interpretation and reporting of exploratory and mechanistic studies.
- You ensure development of new technologies and strategies, which help to elucidate mechanism of toxicity.
- In addition, you ensure scientific contribution to the development of project specific de-risking strategies and their implementation by proactive integration in toxicological studies.
- Furthermore, you represent the NDS Department in interdisciplinary Research & Development project teams.

Requirements

- Doctoral degree in Veterinary Medicine, PhD is a plus. Board certified ACVP or ECVP or equivalent.
- Initial experience in leading employees and experience in the pharmaceutical industry preferred.
- Advanced knowledge and experience in toxicopathological evaluation of in vivo studies (i.e. rodents)
- High level of communication and team skills, good organizational skills and flexibility
- Agile, open and creative approach to support exploratory and mechanistic questions
