

VETERINARY ANATOMIC PATHOLOGIST (M/W)

Our company

The Charles River Laboratories Evreux is a global preclinical service provider with facilities around the world.

Charles River Laboratories offers a comprehensive range of pre-clinical services to meet the needs of pharmaceutical, biotechnology companies worldwide. These include general and reproductive toxicology, carcinogenicity, bioanalysis, immunology and safety pharmacology with special expertise in areas such as NHP.

Our French facility, located in Evreux (one hour from Paris), is looking for a Veterinary Anatomic Pathologist.

Key duties and responsibilities

- Provide scientific expertise in pathology according to client's requirements
- Provide scientific and technical expertise in immunohistochemistry techniques and associated molecular pathology applications
- Supervise necropsies and perform histopathological examinations on a wide variety of laboratory species
- Write pathology reports in support of the toxicology program
- Perform pathology peer reviews
- Understand and review clinical pathology data in an integrative manner
- Interaction with scientists and clients to communicate the significance of the pathologic findings
- Maintain a consistent high level of productivity in the department as per industry standards
- Stay current in the science of toxicological pathology, and remain informed on all legislation and developments related to the job through self-education and external training
- Promote interaction/collaboration between Pathology and other Disciplines
- Ensure that work performed is in accordance with the requirements of the study plan and in full compliance with GLP (where these conditions apply)
- Understand, respect and consistently apply Standard Operating Procedures (SOP)
- Perform any other reasonable tasks that may be required
- Attend scientific meetings and continuing education seminars
- Author scientific manuscripts and give presentations

Qualifications

- A Doctorate in Veterinary Medicine or equivalent, and a formal Residency training in Veterinary Pathology are required.
- Board certification by the American College of Veterinary Pathologists (ACVP) or European College of Veterinary Pathologists (ECVP) is required
- Previous experience in toxicologic or investigative pathology from a Contract Research Organization or pharmaceutical industry is required
- PhD is preferred but not required
- Strong knowledge of related legislation, principles, practices and procedures
- Oral and written English required. French is a definite asset
- Excellent oral and written communication and interpersonal skills
- Strong problem solving and analytical skills
- Demonstrated leadership ability
- Ability to work independently and adapt to change
- Working knowledge of related computer applications
