

New Zealand

## Veterinary Anatomic Pathologist

IDEXX has been changing the veterinary, livestock, water testing, and dairy markets for the better since 1983. Headquartered in the US and a leader in innovative pet healthcare, we service practicing veterinarians around the world with a broad range of diagnostic and information technology-based products and services. Our products enhance the ability of veterinarians to provide advanced medical care, improve staff efficiency, and build more economically successful practices. We also provide worldwide diagnostic tests and information for livestock and poultry, as well as testing for the quality and safety of water and milk. Through innovation, passion, and integrity, we've set a new standard for detection and analysis that continues to enhance the well-being of pets, livestock, and people around the world.

IDEXX ANZ is currently seeking a full-time anatomic pathologist to be located on-site at either the Hamilton or Palmerston North reference laboratories in New Zealand. The diverse caseload serviced by our laboratories include submissions for companion animals, equine performance athletes, alpaca, farmed deer, exotic species from zoological collections, and native avian species. In addition, the preferred candidate should have expertise and experience in production animals - predominantly dairy cattle, beef cattle, and sheep - with a strong focus on delivering quality written and verbal reports and consultations to clients. Required qualifications are a DVM or equivalent degree registrable with the NZ Veterinary Council. Preference will be given to those board-certified (ACVP or ECVP), or individuals with an advanced degree in pathology.

### The successful applicant

You will join a team of 6 experienced, enthusiastic and welcoming pathologists servicing the local NZ market. By utilizing various digital platforms there is also scope for reporting for other international IDEXX laboratories including Australia, North America, and the United Kingdom. Further, collaboration with IDEXX pathologists in other regions is encouraged with CE forums such as weekly consensus rounds. An individual may choose to actively participate in provision of continuing education to our clients, as well as provide support and training for our laboratory staff, technical specialists and pathology residents.

### You, as the successful candidate:

Responsibilities of the role include interpretation of histopathology samples, as well as integration of results from other disciplines (serology, parasitology, microbiology, trace elements, hematology, biochemistry, and PCR) thereby providing clients with a complete diagnostic service for individual patients and herd health monitoring alike. Laboratories in New Zealand are PC2 accredited and post-mortem facilities are available at the Hamilton laboratory.

All veterinary diagnostic laboratories in NZ are contracted by the government to perform surveillance duties to support government claims of freedom of disease to the international community. The successful candidate will act as liaison with the Ministry of Primary Industries (MPI) by establishing working relationships with MPI representatives and submitting formal surveillance reports on behalf of IDEXX laboratories.

### Why IDEXX?

- Competitive compensation, incentives, and benefits, while enjoying purposeful work that drives improvement. The job offers a salary commensurate with experience, five weeks holiday plus public holidays, and funded CPD. Annual NZ Veterinary Council and ACVP/ECVP registration fees are also paid for.
- To facilitate a smooth onboarding process and immediately becoming a productive member of the team, IDEXX will assist the successful applicant in obtaining the right to work, registration with the NZ Veterinary Council and relocation assistance if appropriate.
- Ongoing health and wellness activities, platforms and programs, as well as voluntary community leave entitlements.
- Free onsite parking and a flexible working environment
- Yes, we have 'bring your pet to work' days!!
- Most importantly, this role offers you an opportunity to make a difference and positively impact the community alongside a fantastic local team who pursue our purpose with passion

We're proud of the work we do, because our work matters. An innovation leader in every industry we serve, we follow our Purpose and Guiding Principles to help pet owners worldwide keep their companion animals healthy and happy, to ensure safe drinking water for billions, and to help farmers protect livestock and poultry from disease. We have customers in over 175 countries and a global workforce of over 9,000 talented people.

So, what does that mean for you? We enrich the livelihoods of our employees with a positive and respectful work culture that embraces challenges and encourages learning and discovery. At IDEXX, you will be supported by competitive compensation, incentives, and benefits while enjoying purposeful work that drives improvement. Let's pursue what matters together.
