

Resident in Anatomic Pathology

Veterinary Pre-Clinical Sciences

Location: Guildford
Salary: £29,614 (Plus 10% Veterinary Market Allowance if MRCVS Registered)
Fixed Term (Available Up Until 30/09/2025)
Post Type: Full Time
Closing Date: 23.59 hours BST on Sunday 18 September 2022
Reference: 057522

The School of Veterinary Medicine, at the University of Surrey is accepting applications for a residency position in anatomic pathology, starting in September 2022, or as soon as possible thereafter. The successful applicants will be based in the £11 million state-of-the-art Veterinary Pathology Centre in Guildford.

Residents will receive a comprehensive, in-depth educational experience in all aspects of veterinary and comparative anatomic pathology. This will include the necessary training experience and access to training materials that are required to sit for the Phase I and Phase II certifying examinations of the American College of Veterinary Pathologists (ACVP).

Training will be case based, using diagnostic submissions received by the Veterinary Pathology Centre that comprise a varied species range that includes companion animals (dogs, cats, horses), livestock, camelids, wildlife, and zoo and exotic species. Structured training sessions will complement the practical diagnostic experience and will include weekly rounds sessions focused on gross pathology, histopathology (including surgical biopsy cases and the Joint Pathology Center's Wednesday Slide Conference), and journal clubs. Other subspeciality rounds will focus on areas such as comparative laboratory animal pathology and zoo, exotic and wildlife animal pathology.

Residents will also undertake research projects, prepare manuscripts for peer-reviewed journals, and submit abstracts for poster and oral presentations at university, national, and international meetings. They will also participate in veterinary student teaching in didactic and clinical settings. Residents will be encouraged to engage in collaborative research projects with researchers inside or outside the University. Occasional opportunities to complete externships outside of the University will also exist.

The training program's key objectives are to:

- 1) Provide a comprehensive training in comparative pathology that centres on understanding of the pathologic basis of disease and serves as a solid foundation for a successful career across a range of areas in veterinary pathology.
- 2) Prepare residents to sit the ACVP board certifying examination.

These appointments are three-year positions, renewable on an annual basis, assuming satisfactory performance.

This is an exciting opportunity for the successful candidates to play a role in helping to shape our new Pathology Residency Training Program, and to further advance the scholarly activities in our Veterinary Pathology Centre, including collaborative research and education programmes in veterinary pathology. For brief informal enquiries, please contact Kate English kate.english@surrey.ac.uk Section Lead Pathology, or Josue Diaz-Delgado, j.diazdelgado@surrey.ac.uk, Residency Programme Director For more information and to apply, please visit: www.surrey.ac.uk/jobs
