

The Department of Pathobiology at the Faculty of Veterinary Medicine, Utrecht University, The Netherlands has a vacancy for a position as

RESIDENT (0,80 fte)

A vacancy exists in the Veterinary Pathology Diagnostic Center (VPDC), starting 1.2.2018. The VPDC provides teaching of DVM students (year 1-6), offers service in diagnostic pathology (companion, farm and exotic animals) and performs patient oriented research.

The pathology residency of the department of pathobiology is an in-service training program in veterinary pathology that can lead to the certifying examination of the European College of Veterinary Pathologists (ECVP) and that covers all species from the whole animal to the gene. During this time the candidate shall acquire competence and expertise in the broad field of veterinary pathology which will allow the successful pursuit of a career in teaching, research and/or diagnostic pathology.

Duties

Your tasks will consist mainly of participation with increasing independence in diagnostic and teaching activities and some research. The position has many contacts with veterinarians, both in the field of clinical medicine as well as research, and biomedical research workers. It is necessary to (co)-author two original articles in the area of veterinary pathology.

Qualifications

We are looking for a veterinarian with proven interest in the area of veterinary pathology in research, diagnostics, and teaching. You are able to organize your work efficiently and independently. You have great dedication and perseverance and have good social and communicative skills. You are prepared to learn Dutch within a reasonable period of time (1 year).

Conditions

We offer a temporary contract for 1 year with the option for extensions for a total of 3.5-4 years. Starting date is 1.2.2018. Salary is according to experience and within scale 10 according to the CAO of the Dutch Universities (VSNU-CAO).

Information

For more information contact A. Gröne (a.groene@uu.nl). Do not send applications to this address.

Application

Applications, (consisting of a letter of interest, a full curriculum vitae, and contact information of 2 references) should be sent before **1.10.2017** by e-mail to Suzanne Hoogland (s.hoogland@uu.nl). This position is open for veterinarians with an EU veterinary license only.
