

Animal *Health* Trust

Veterinary Anatomic Pathologist Permanent Full Time Starting salary in the region of £50,000

The Animal Health Trust is a large UK-based veterinary charity dedicated to promoting animal welfare through improved understanding of diseases in cats, dogs and horses. Situated in a beautiful location just 4 miles from Newmarket in Suffolk, the AHT has multi-disciplinary small animal and equine referral clinics, veterinary diagnostic laboratories including pathology facilities and a number of associated research groups (including bacteriology, epidemiology, genetics, immunology, molecular oncology, pathology and virology).

We are seeking an anatomic pathologist to participate in both diagnostic service work and research across a predominantly equine and companion animal caseload. The work focuses mainly on post mortem evaluations, surgical biopsies, and immunohistochemistry interpretation. There are opportunities to participate in a variety of collaborations in multidisciplinary research; examples include, but are not limited to, the fields of equine infectious disease (supported by the Equine Thoroughbred Industry), companion animal oncology and internal medicine. The ability to take primary responsibility for cases, work within deadlines and have a pro-active approach to problem solving is essential. Previous experience of equine anatomic pathology is preferred but not essential.

Starting salary is dependent on experience and qualifications. In addition to this AHT benefits include: attractive pension scheme, 27 days annual leave plus Bank holidays, comprehensive employee assistance scheme, time off for research and continued professional development and a generous CPD allowance.

Board certification (ACVP, ECVP or ECVCP) or FRCPath is highly desired, however board eligible candidates that have completed a recognised veterinary pathology residency program will also be considered. Membership with the RCVS (MRCVS) will be a requirement on starting.

For initial enquiries and further information please contact Richard Newton, Director of Epidemiology and Disease Surveillance: richard.newton@ah.org.uk or Stefano Di Palma, Anatomic Pathologist: stefano.dipalma@ah.org.uk
