

# ECVP/ESVP Summer School in Veterinary Pathology

## Marie Curie Training Courses

Summer School 2005 – Reproductive System 153/04C

SLIDE NO	ORGAN	STAIN	DIAGNOSIS	HISTOLOGICAL DESCRIPTION	DRUG causing the lesion
153/04 C	Prostate and uretra Veal calf	HE	CONTROL	Branched tubulo-alveolar gland whose ducts empty in the prostatic urethra. Urethra has a transitional epithelium with a smooth surface. Large excretory ducts with multilayered epithelium starting from the urethra, leading to tubulo-glandular tissue lined with one layered cubic epithelium. In the periphery near the muscular layer some mucinous acini occur. Slight secretion may occur. The gland is surrounded by a muscular layer.
