

ECVP/ESVP Summer School in Veterinary Pathology

Summer School 2011 – Equine Pathology

0907119 - UPenn

Horse – cauda equina

- Nerves and ganglia of cauda equina severely effaced by pyogranulomatous fibrosing infiltration inducing severe thickening
- Nerve fiber and neuron loss
- Epithelioid macrophages, neutrophils, lymphocytes, plasma cells and multinucleated giant cells

MD: Pyogranulomatous ganglioneuritis, caudal

Etiology unknown, no good hypotheses
