

The **Tierpathologie München** is one of six **Antech** veterinary labs in Germany. In collaboration with more than 1,500 veterinary clinics and veterinary practices, we provide histopathological service on biopsies and cytological specimens from dogs, cats, horses and pets. Our philosophy is to strengthen diagnostics through close integration of pathology and clinical practice.

In their daily work, our employees form the backbone of modern laboratory diagnostics. A family environment with strong cohesion among colleagues creates individual freedom and the opportunity to get involved and develop further. Become part of our team and let's shape the diagnostics of the future together! Better diagnostics. Better medicine.

These are your tasks:

- Histological and cytological examinations of all areas of veterinary pathology
- Professional medical support for the clients
- Application of immunohistochemical examination methods
- Additional project work

This is what you provide:

- A veterinary degree including in-depth training in the field of pathology (Fachtierarzt and/or Diplomat (ACVP/ECVP desirable)
- Thorough knowledge and experience in histopathological diagnostics
- A high level of responsibility and initiative
- Strong communication skills as well as commitment and team spirit
- Very good knowledge of spoken and written German

This is what you can expect from us:

- A secure and interesting workplace with varied activities in the field of animal pathology
- Working independently in a motivated and future-oriented team of eight pathologists
- Opportunity for internal and external training and further education
- Professional working conditions with a performance-related salary
- Regulated working hours
