2026 Registration Fees		
Registration Type	Early Bird, Through February 16, 2026	Standard Rate
In-Person	\$750	\$1,000
In-Person Trainee	\$500	\$750
Virtual	\$400	\$500
Virtual Trainee	\$300	\$400

The goal of this 5-day workshop is to provide intense interactive sessions aimed at training the next generation of comparative pathologists and biomedical scientists who will be involved in the development and use of mouse models of human disease, while also providing a continuing education resource for those who have experience in the field. The workshop will focus on how mouse models of human diseases are being used in basic research and preclinical studies addressing the pathogenesis and/or efficacy of novel treatments.

In-person attendance will provide registrants with invaluable opportunities for networking and building contacts in the field of comparative pathology. For those unable to attend in person, virtual attendance will include the opportunity to interact via virtual chat, with most lectures also being available for 90 days as on-demand recordings.
