

# ECVP/ESVP Summer School in Veterinary Pathology

## Marie Curie Training Courses

### Summer School 2008 – Gastrointestinal ZH4

ZH4, Porcine	points
<p>Small intestine:</p> <p>Adhered multifocally to the surface enterocytes multiple coccoid to rod-shaped bacteria are visible. The surface enterocytes are intact, the goblet cells normal in appearance and in the crypt cells few mitotic figures can be seen.</p> <p>In the lamina propria few numbers of plasma cells, lymphocytes and only single neutrophils are visible.</p> <p><b>Name of the Disease:</b> Enterotoxigenic colibacillosis</p>
