

ECVP/ESVP Summer School in Veterinary Pathology

Marie Curie Training Courses

Summer School 2008 – Gastrointestinal ZH7

ZH 7 Bovine	points
<p>Small intestine:</p> <p>On the surface of the enterocytes but mostly in the crypt lumina attached to the epithelial cells 2-4 micrometer big, round-shaped, oocytes are visible (interpreted as cryptosporidia oocysts). In the lumen of the gut few sloughed enterocytes and moderate numbers of coccoid bacteria are visible. Some coccoid to rod-shaped bacteria can be also seen the crypt lumina and few plasmacells can be found in the lamina propria.</p> <p>Name of the Disease: Cryptosporidiosis</p>
